

ARE YOU FINDING YOU HAVE A LONG WAIT TO GET A SEAT IN AN ELECTRICAL APPRENTICESHIP PROGRAM???

If you like to work with both your mind and your hands and enjoy calculations and precision work, then we can help you gain the skills and experience you need for a rewarding career as an electrician.

The Building Trades Advancement College - 625 Electrical Workers Campus is now accepting applications for September's program.

- For tradespeople by tradespeople
- Preferential work- placements with Industrial/ Commercial/ Institutional contractors
- State of the art school with the latest equipment.

Electrical Construction and Industrial Pre-Employment Program introduces you to a variety of career opportunities in the electrical trades.

Whether your interest is electrical installation or maintenance, residential or commercial wiring, machine repair or some other aspect of the electrical industry, our cooperative vocational education program leads to Level One electrician theory accreditation with credit for 900 practical hours which is a great start towards employment as an apprentice.

We provide a combination of technical training and real-world experience so that potential employers need not worry about your level of experience - you will come to them prepared to work. Employment opportunities are many, varied and well-paying. There is no limit to how far you can go!

Our program is open to anyone who meets the requirements:

- Completion of Grade 12 or GED or NSSAL
- Interest in working in the electrical trades
- Participation in an interview
- Participation in a Mechanical Aptitude Test

For more information, to register or to arrange an interview, please contact:
